

OUR STRATEGIES:

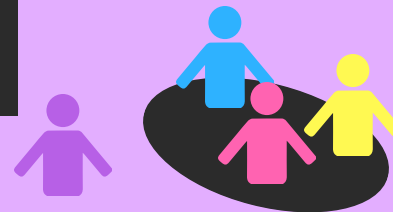

Connect youth to mentors & secure training-hiring partnerships with local employers interested in more inclusive hiring

Train youth to acquire relevant and marketable hard and soft skills valued by employers

Support youth with regular feedback and coaching on-the-job as they build tangible, real-world experiences over 6 months

Only 1 in 4 persons with intellectual disabilities or ASD are gainfully employed

OUR NEED: There is a lack of formal, supported employment opportunities that allow youth with developmental disabilities and ASD to develop real-world experiences and relevant skills
